

# CLIMATE LEADERSHIP FOR A HEALTHY & PROSPEROUS UTAH

---

## OPPORTUNITY

---

Utahns have a proud history of environmental stewardship and tackling global issues with collaborative, innovative and compassionate solutions. Embracing climate leadership will position our state to continue to be a global leader on technological innovation, but more importantly, cleaner air for us, our children, and our grandchildren.

---

## BENEFITS OF CLIMATE LEADERSHIP

---

- Continuing Utah's legacy of stewardship and protecting our unparalleled natural beauty.
- Global leadership on the energy and water innovation.
- New opportunities for rural Utah communities.
- Healthy communities and cleaner air and water for all Utahns.

---

## PATHWAYS FOR SUCCESS

---

✓ **Harnessing New Federal Resources:**  
Billions of dollars are available to support Utah's clean energy economy. Smart and practical leadership by Utahns can make this work for us.

✓ **An Impactful 2034 Winter Olympic and Paralympic Games**  
As the expected host of the 2034 Winter and Paralympic Olympic Games, we can make cleaner air and clean energy a new legacy of our state.

✓ **Ensuring All Utah Communities Benefit**  
Utah leaders can create an energy transition that makes all of Utah, including Utah's energy communities, tribal communities, and communities of color, stronger and more resilient.

---

## FAST FACTS

---

*A worldwide poll of more than 75,000 people in 77 countries shows a vast majority want governments to do more to address climate change.*

80%

*of people globally want their country to do more on climate change*

72%

*of people globally want their country to move to clean energy quickly*

69%

*of people globally want their country to move to clean energy quickly*

---

## LEADING BY EXAMPLE

---

Utah Congressman John Curtis founded the House Conservative Climate Caucus in 2021, now the largest caucus in the U.S. House of Representatives with over 80 members.

“

*We can do it here in the United States, or we can sit back, ignore the climate movement and watch the next industrial revolution take place outside of the United States. The world has sent a signal that it will buy clean energy technology. Will we sell it, or will we watch it be sold?*

”

---

## WHAT IS MY ROLE?

---

### **Let leaders know that Utahns support bold climate action**

Durable solutions to climate change require bipartisan solutions. Utah can be the conservative state that moves beyond partisanship to lead on climate action! Let your elected leaders know you support local policies that reduce pollution.
